CYBERSAFE

Internet safety is on the mind of every parent. It is estimated that 2 out of 3 households have a computer and access to the internet. What this also means is that there are risks involved.

Think about this: 26% of kids ages 9 -15 went to meet a friend that they met online without the permission of their parents.

What that tells us is that kids either don't know the rules, or don't understand the seriousness of online safety.

Kidproof´s CyberSafe Internet Safety workshop covers the topic of Internet safety through interactive, non-threatening and entertaining lessons.
Students learn through:

• Group work to identify with realistic events

• Role play and scenarios to teach useful skills

• Discussion around the difference between face-to-face friends and online friends

Students will learn:

• Rules for safely using social networks

• How to recognize warning signs from online predators

• How to identify, avoid, and respond to cyber bullying

• How to get the most out of the internet while staying safe

*2 hours
Recommended for kids ages 8-11*

The CyberSafe Internet Safety workshop focuses on teaching kids how to recognize warning signs, safe and unsafe situations, and the skills they need to make safe choices. This is not a technical or software computer course.

Host Kidproof's CyberSafe Internet Safety workshop and help kids learn to make safe choices while enjoying all that technology has to offer.

Ask about adding the free Parent Guide book to help to help parents understand the key issues in internet safety and how to further protect their children from potential dangers online.

Why Kidproof

For a decade, Kidproof has earned the trust of parents and educators to deliver the most current, relevant, affordable and valuable safety education on the planet!
Join hundreds of thousands of children and register for a Kidproof program today!

We make safety fun!

Our safety programs are fun, entertaining, exciting, and developed by leading experts in child and family safety. Make no mistake, we take protecting kids very seriously and our diligence in providing the most accurate information shows through in every course we deliver.

More than just safety lessons

We believe that kids learn by "doing" and our programs are action packed! Through role play and group activities, Kidproof students learn to develop their critical thinking skills by working through possible scenarios and outcomes.

Every Kidproof program comes with standard student workbooks and materials that support the lessons and provide essential "take-aways" that become a great resource for the whole family! In addition, we have developed corresponding "optional materials" like parent guide books, craft kits, first aid kits, and other goodies that can be added to any class for extra value!

1. Select course(s)

2. Confirm dates with your local Kidproof Safety Team

3. Enjoy the class!

The only thing we ask is that you provide a safe public facility (no private homes) to host the program and organize your group of 10 or more kids. A certified and screened Kidproof instructor will attend your facility on the day of the class with all student materials and ready to teach. And you only have to pay for students that attend.

If you have to cancel - no problem! With no deposit or cancellation penalties you can be free to cancel a class anytime.

BECOME A CERTIFIED TEACHER!

Testimonials

Perth Road PS "Our student council is considering offering this course on an annual basis."

Bianca "I would recommend this course because all people should know what to do if they come across any of the scenarios that we practiced."

North Norwich Public School "The course exceeded my expectations, to be honest!"
