

Job Title : DigiDash

Job ID : 1753

Client Id : pamelita

Job Type : Other Fix job

Start Date : 10/29/2015

Delivery Date : 11/8/2015

BDE Time Estimate : 30.00 hour(s)

Job Description :

- Client has provided with reference mockup of homepage in PDF. She wants us to either clone it or make something similar to it.
- We directly need to create HTML with Responsive and then WordPress.
- Client should be able to add as many boxes she wants on the homepage.
- In the PDF, ignore other tabs. There will be only two tabs : Homepage and Blog
- Blog will have blog list page and Individual blog pages.
- On the homepage, the boxes just have images and text. The boxes have titles over each and the text is format-able using WYSIWYG editor (i.e.: bullets, drop down choices for paragraph of H1,2,3,4, italics, bold, etc.). The image should be clickable to see an expanded version of the image.
- Basically make sure all the usual wp functionality still works
- There should be a black admin bar across the top that says view site or view dashboard....so admin can click between front and back end.
- Client should be able to easily ADD and EDIT image/text boxes on homepage and posts in blog page.

File provided by client:

- 201519_2015-10-21_ES_DD_wordpress_design_concept.pdf

Milestones:

Title	Start Date	Delivery Date
Final Deliverable	10/29/2015	11/8/2015
